PROJECTS

CSVParser

March 2025

- A JavaFX application
- An application that reads voucher codes from CSV files and combines them with customizable parameters to produce formatted, multi-card PDF documents.

KentLink

May 2025

- A JavaFX application with MikroTik integration
- A PPPoE Management System that enables administrators to manage PPPoE user accounts, monitor connections, and assign IP addresses over a shared Ethernet network.

Vetality Shop

May 2025

- A Kotlin mobile application with Firebase and Cloudinary integration
- An E-commerce platform that enables users to shop for veterinary and agricultural supplies with product browsing, cart management, wishlist, multi-step checkout, and order tracking.

Dunzo

December 2025

- A full-stack web application built with Django, React, Vite, Tailwind CSS, and Schedule-X with Supabase integration
- A project management platform that enables teams to organize projects, assign and track tasks, manage team members with role-based access, schedule calendar events, view activity timelines, and monitor progress through a centralized dashboard.

NavCIT

December 2025

- A React and Spring Boot web application with PostgreSQL, Tailwind CSS, and Groq AI integration
- An indoor campus navigation system for CIT University featuring interactive floor-plan visualization, A pathfinding with turn-by-turn directions, room search, user reviews, and an AI-powered campus guide chatbot using RAG*

AgarthaTech

March 2026

- A Next.js and Solidity full-stack dApp built on the Polkadot EVM with Supabase, Hardhat, wagmi, and RainbowKit integration
- A decentralized legal escrow platform for freelancers that enforces trustless payments through multi-signature smart contracts, featuring role-based workflows for clients, freelancers, and legal arbiters, document hashing for agreement verification, and an on-chain CPRA compliance ledger aligned with Philippine legal standards.

TuroLink

March 2026

- A Flutter mobile application with Nearby Connections, Google Gemma on-device AI, SQLite, and Syncfusion PDF integration
- A peer-to-peer classroom platform that enables offline learning through direct device connectivity, real-time document sharing, QR-based pairing, on-device AI assistance, and PDF generation.

AgarthaKayak

May 2026

- A Next.js and Solidity full-stack dApp built on the Polkadot EVM with Supabase, Hardhat, wagmi, and RainbowKit integration
- A decentralized legal escrow platform for freelancers that enforces trustless payments through multi-signature smart contracts, featuring role-based workflows for clients, freelancers, and legal arbiters, document hashing for agreement verification, and an on-chain CPRA compliance ledger aligned with Philippine legal standards.

ASTA

May 2026

- A Python web application built with Streamlit, PyTorch, Hugging Face Transformers, OpenCV, and LoRA fine-tuning
- A skin tone analysis tool that uses a fine-tuned Vision-Language Model to classify seasonal color types from facial images and provide personalized color palettes, outfit suggestions, and makeup recommendations.

AgarthaVision

Ongoing

- A Kotlin Android application built with Jetpack Compose, CameraX, Supabase, and a self-hosted FastAPI container with a YOLOv26 + EfficientNetv2 custom model
- A diagnostic surveillance system that enables medical technologists to detect soil-transmitted helminth eggs through continuous microscope slide capture, real-time AI inference, human-in-the-loop verification, and cloud-synced session reporting.

PropertyManager

Ongoing

- A full-stack web application built with Next.js, React, PostgreSQL, Drizzle ORM, Better Auth, DigitalOcean Spaces, Tailwind CSS, and shadcn/ui
- A multi-tenant property management platform that enables real estate managers to organize properties, upload and view documents with secure cloud storage, track units, and monitor portfolio stats through an interactive dashboard.

EDUCATION

Cebu Institute of Technology - University

2023 – Present

Bachelor of Science in Computer Science

Cebu City, Cebu

Visayas State University - Integrated High School

2017 – 2023

High School and STEM strand

Baybay City, Leyte

Visca Foundation Elementary School

2009 – 2017

Kindergarten and Elementary

Baybay City, Leyte

SKILLS

Languages : Python, TypeScript, JavaScript, Java, Kotlin, Dart, SQL, Solidity

Frameworks & Libraries : Next.js, React, Django, Spring Boot, FastAPI, Flutter, Jetpack Compose, JavaFX, Tailwind CSS, PyTorch, Hugging Face Transformers, OpenCV

Databases & Cloud : PostgreSQL, Supabase, Firebase, Drizzle ORM, Cloudinary, DigitalOcean

Developer Tools : Git, GitHub, Docker, Hardhat, Figma, VS Code

AI / ML : Vision-Language Models, LoRA Fine-Tuning, RAG, Computer Vision
